Art Unit

2626

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 July 2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.

- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

JEROME GRANT II  
PRIMARY EXAMINER

Detailed Action

1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-15 are rejected under 35 U.S.C. 102(a) as being anticipated by Ohta.

With respect to claim 1, Ohta teaches a method for forming an output image forming system (according to figure 1), comprising the steps of:

Scanning a predetermined portion of an image via image data scanners 16, 17 corresponding to an input document to reduce white space, said input image a first set of dimensions; and reproducing said image data (high quality printer 18) a selected number of times (page 13, liens 5-8) on a printing medium to form said output image, wherein said reproduced image data in said output image has said selected number of input image reproductions having different dimensions ( via rotations, see page 29, lines 25-30 or by enlargement and reductions, see

Art Unit: 2626

page 29, lines 37-41. Note, the white space is reduced when the old or first dimension is set as the new or second dimension. The image of the first dimension is magnified to the dimension of the second dimension to eliminated the blank or null areas.

With respect to claim 2, see page 29, lines 37-41.

With respect to claim 3, see page 29, lines 37-41.

With respect to claim 4, the step of obtaining instructions (via user at work station 15) for the formation of the output image.

With respect to claims 5 and 13, the user interface is the client computer taught by Ohta.

With respect to claim 6, Ohta teaches receiving instructions from a remote location. Note that the client computer is over the Internet according to figure 1.

With respect to claim 7, the receiving of the signal from a remote device (via client computer 1).

With respect to claim 8, the document scanners are elements 16 and 17.

With respect to claim 9, refers to page 29, lines 18-24. The detected dimensions are found via window 1 of the image data, according to page 29, lines 18-24, for enlarging or reducing the image (page 29, lines 37-42) so that the images are printed on a single recording medium. See figure 8.

With respect to claim 10, Ohta teaches referencing the size of the print medium (via window 1) which studies the shapes for printing. See also page 29, lines 37-41.

With respect to claim 11, Ohta teaches a feedback size of the layout according to the display window of the client computer and a layout of that image by windows 2-6.

With respect to claim 12, Ohta teaches an image forming system, according to figure 1, comprising: a scanner 16 and 17 for scanning a predetermined portion of an input image on an input document to reduce white space, said input having a first set of dimensions. Ohta teaches an input image reproductions having different dimensions ( via rotations, see page 29, lines 25-30 or by enlargement and reductions, see page 29, lines 37-41. Note, the white space is reduced when the old or first dimension is set as the new or second dimension. The image of the first dimension is magnified to the dimension of the second dimension to eliminate the blank or null areas. Ohta further teaches a printing mechanism (18) in communication with a processor (edit server 60 taught at page 28 beginning at line 39), wherein said processor receives instructions relating to an input image and instructs said printing mechanism to print a predetermined number (page 13, line 58) of replications of the image in enlarged or reduced fashion on a print. See page 29, lines 37-41.

Art Unit: 2626

With respect to claim 14, the enlargement and reduction process as claimed is discussed by the combination of windows 4-6 at page 29.

With respect to claims 15 and 16, Ohta teaches enlarging and reduction to fit on the print medium. This procedure is done by windows 4-6. See page 29, line 37 to page 30 line 1.

2.

***Examiner's Remarks***

Applicant's remarks have been considered but are unpersuasive to allow the claim. Applicant argues that Ohta does not reduce white space. But examiner contends that applicant means Ohta does not reduce any space where the image data is not. However, the examiner contends that Ohta teaches determining what the image dimension is and determining what an output dimension is suppose to be (the entire portion of the read area) . Knowing these dimensions, the margins or null areas, the areas applicant identifies as the white areas, can be eliminated. Hence, Ohta addresses the claimed feature.

3.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
